

VDE Fully insulated Socket Set and Accessories

New for 2012/13 these products have been introduced to the Draper range as a result of the increasing numbers of modern high power hybrid and electrical vehicles that carry a significant risk of electrocution.

All the items shown on this page are manufactured to DIN and EN60900:2004 and are fully encapsulated (insulated) to prevent touching the exposed metal whilst working.

Unlike mains electricity, vehicle electrics are mainly DC - these products will insulate users up to 1000V AC and 1500V DC.
