

PRODUCT INFORMATION

Please note that tabular data within this section gives details of the dimensions of our various tool chests as follows;

**Dimensions
L x W x H**

Refer to the diagram, left.

PRODUCT INFORMATION

This silhouette is used throughout the tool chest section as an approximate scale indicator and represents a person 5'10" tall (1.8M)

TOOL BOX DIMENSIONS - The measurements shown in this Catalogue are approximate and shown as the following: Length (L), Width (W), and Height (H), and are shown in the table below each catalogue entry.

STEEL TOOL BOXES AND CABINETS - The drawers and storage space are measured showing the "internal" dimension, ie. that inside the box or cabinet. This gives a more accurate assessment of the area inside the products - as the steel used to make the metal boxes can be up to 3 or 4mm thick.

PLASTIC TOOL BOXES, STEEL STORAGE CABINETS AND TOOL CASES - These are measured showing the "external" dimension, ie. that outside. Generally these are made from thinner materials and the internal measurement is not as critical.

NB: All dimensions can vary during production.

1 TC6/HD-PRO
