DAVE SAYS

The "free air delivered" by each compressor is the amount of air available to drive tools running off the compressor.

ABOUT CONNECTIONS...
We have, for your convenience, put together connection kits (page 600) These will link most smaller compressors in the Draper range (or other manufacturer's ranges) to many air tools. The kits have 1/4" and 3/8" BSP connections. However, we also provide most components to assemble to your own requirements.
