**BATTERY BOOSTER CABLES**

All our battery booster cables use quality copper cables with heavy duty clips which are correctly crimped and coated in durable plastic which does not go brittle in the cold. The 16mm<sup>2</sup> and 25mm<sup>2</sup> are for 12V and 24V systems and conform to British Standard BSAU237a. This means they have passed stringent tests ensuring they'll work when you need them. Our Stock No. 54600 is extra long for commercial vehicles where it may not be so easy to position the vehicles close to each other. As a general rule of thumb use 25mm<sup>2</sup> cables for vehicles over 2000cc and diesel engines.

**BATTERY BOOSTER PACKS**

Battery Booster Packs to assist in jump starting vehicles are shown on page 80.
