DAVE SAYS

SPARK PLUG WRENCHES - SIZES

To check the correct spark plug wrench the user must go by the spark plug size - 10mm or 14mm, which refers to the size across the threads of the plug.

The size of the hexagon wrench is different from that of the spark plug. The 10mm plug has an "across the flats" wrench size of 16mm - 5/8" AF with the 14mm plug at 20.8mm - 13/16" AF.

For a selection of spark plug sockets, see Section 1 Socketry under 3/8" or 1/2" square drive pages.
